

Product Information

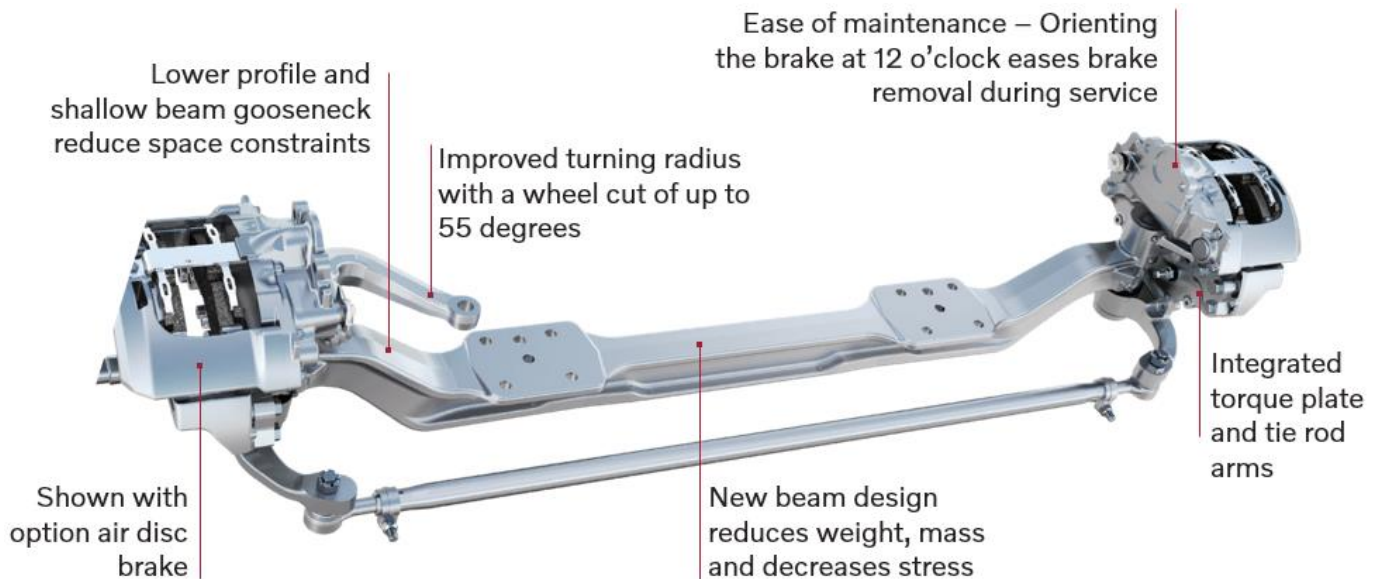

240- MERITOR® MFS+131™ FRONT AXLE
Updated: January 27, 2025

The Meritor MFS+ series front axle is optimized for highway / linehaul applications and is a lighter-weight design compared to the forerunning MFS series axle. Built with market-leading technology designed to save weight, improve performance, and reduce service time.

FEATURES & BENEFITS

- Integrated torque plate knuckle and tie rod arms reduce weight and increase payload
- Fully optimized I-beam design for a lighter weight package without sacrificing performance and reliability
- Easy-Steer™ bushing offers superior steering
- 12 o'clock brake orientation eases brake removal during maintenance
- Wheel-cut up to 55 degrees improves turning radius

Beam Drop in. [mm]
3.5 [89]
